- Statement Count Filter now works properly when printing Patient Statements. 12247
- Modifiers are now limited to 2 characters. 12297
- AR Management Module is no longer marking Primary billings to be re-billed when the line item is for secondary or tertiary responsibility. 12726
- Suppress Legacy ID field has been added to the Insurance Carrier screen. This field will allow claims to go out as NPI only claims, without requiring the customers to remove their PIN and Qualifiers from Lytec. 12747
- Exclude Paid Billings filter on patient statements has been corrected. 12955
- Lytec 2008 SP1 will now support 8 diagnosis codes. 12781
- The Practice Insight user name and password will now appear on the Settings/Preferences/Claims Management tab. 13124
- Insurance Aging Reports will now print using Scheduled Tasks. 13207
- National Drug Code fields have been added to the Billing screen. 11519
- User preference has been added to allow customization of how collection module ages. 11555
- New field was created to allow users to suppress legacy id numbers on EDI and paper claims. 13171

List Edit and Entry

- Find option now functions properly on Patient Notes. 12994
- In the Patient screen, if you pressed F3, followed by OK, and the F3 again, another window would appear. This has been corrected. 12815
- Recall List screen now has the ability to remove, re-arrange, and add columns. 11592
- Wait List screen now has the ability to remove, re-arrange, and add columns. 11593
- Mouse Scroll Wheel functionality has been added to Lytec grids and reports.
- Primary Insurance Name now shows on the Primary Insurance Table layout. 11929
- Insurance Carrier window now allows scrolling through to different carriers using the arrow keys. 12802
- You will no longer be asked to save twice if a previous save of a patient has been canceled. 12323
- Cell phone and Home Email fields now save properly from within the Patient Lookup edit feature. 13379
- Users who only have view privileges on patient information no longer cause database errors. 13392

Image Compression and Storage

- The Compress Images option is now available from the Activities menu. 12134
- Lytec now requires a backup before compressing images. 12135
- Image storage has been modified to allow for inclusion of images on custom reports. 12792
- Lytec now checks for users with open images prior to allowing the compression of images. 12133

Reports

- Patient Aging report can now be sorted by Patient Name. 11406
- The Sales Tax Report no longer shows the date of service twice. 11616
- The Billing Reconciliation to Appointment Report now has a filter to only show No Bills. 11632
- The Practice Analysis Report labels have been enhanced. 11837
- Patient Package now asks if the Superbill printed correctly. 12130
- Patient Ledger Report will now accurately report on Archived billings if the option is selected. 12230
- Transaction Code report now allows you to print both active and inactive codes at the same time. 12730
- Sort option on Transaction Code report now functions properly. 12732
- Mouse Scroll Wheel functionality has been added to Lytec grids and reports.
- Saving large values in Aging Bucket definitions no longer crashes the program. 11982
- Practice Analysis reports now list "Debits" instead of "Charges" (Label Change). 11837
- Printing superbills from Patient Package now requires validation of proper printing. 12130
- Location filter is now working for patient labels. 12269
- AR Totals for Aging now working properly for Expected values. 12324
- Day Sheet and Transaction Journal are no longer printing duplicate provider names in datasets that were previously having this issue. 12498
- Custom reports can now be printed from the Scheduler. 12558
- Saved data filter ranges now work for scheduled aging reports. 13167

Scheduler

- The Scheduler dockable grid headings now function properly in vertical mode. 11600
- The Mobile Phone field is now available from the Appointment window. 12129
- Changing the phone number on an appointment now will update future appointments to include the same changed phone number. 12142
- Transaction Codes now listed in alphabetical order on the Include 1 tab of the Practice Analysis Report. 12155
- Patient Future Appointments no longer shows today's appointment that has moved into the past. 12262
- Authorization filters on Appointment Entry now exclude Expired/Used billings if selected. 12315
- Patient Next Appointment date field on custom reports now ignores today's date and goes to the next actual appointment. 12474
- The appointments tab now shows the day of the week again. 12639
- Recall appointment filter has been corrected so that it pulls accurately. 11457
- Updating a patient's phone number in their chart now updates the appointment phone numbers upon prompt. 12142

Charges and Payments

- Prepayment balances greater than 0 are now bold and red on the Charges and Payments screen. 11596
- When switching to a new chart on the billing screen, you will no longer be asked to save the billing if no changes have been made. 11804
- The speed when accessing a Patient Record in Charges and Payments has been improved. 12080
- Billing search was not always defaulting to the currently open billing when launched multiple times. This has been corrected. 12110
- The process of accessing a patient record from Charges and Payments has been changed to improve speed. 12080

Verbiage Changes

- Verbiage has been corrected on the Unarchive Billings form. 12316
- Verbiage has been corrected on the Delete Inactive Patients form. 12317
- Verbiage has been corrected on the Archive Inactive Patients form. 12318
- Verbiage has been corrected on the Delete Archived Patients form. 12319
- Various places within Lytec included verbiage that was cut off. This has been corrected. 12310, 12311, 12312

Program Startup and Maintenance

- While Lytec is loading, the cursor will now appear as an hourglass. 12180
- The cursor will now change to an hour glass after selecting a practice, and while waiting for that practice to open. 13033
- The cursor will now change to an hour glass after logging in with security credentials. 13034
- Auto Log-Off now works if Lytec has been minimized. 12335
- The Key Word filter on the Audit Trail Report now functions properly. 12775
